**North American Financials
Capital Securities Trust**

Semi-Annual Report

June 30, 2011

August 25, 2011

Dear Investor,

We are pleased to provide you with the semi-annual report for the North American Financials Capital Securities Trust (the "Fund") for the six month period ending June 30 2011. The Fund is designed to provide investors with exposure to an actively managed portfolio of Innovative Tier 1 Capital Securities. The portfolio consists primarily of the six largest Canadian banks, large Canadian insurance companies and U.S. financial institutions with a minimum issuer rating of "A" by S&P. The portfolio is actively managed by Connor, Clark & Lunn Investment Management Ltd. (the "Investment Manager"). The portfolio composition is approximately 50% Canadian issuers and 50% U.S. issuers.

The Fund's investment objectives are to (i) provide Unitholders with attractive tax-advantaged quarterly cash distributions, and (ii) return to Unitholders the original issue price of the Units upon termination of the Fund on November 30, 2014. Distributions are targeted to be \$1.50 per annum per Unit consisting primarily of returns of capital, representing a yield on the Unit issue price of 6.0% per annum.

It was a challenging period in the capital markets as investors vacillated between "risk-on" (bullish) and "risk-off" (bearish) sentiments. Initially, investor confidence in the global recovery remained resilient despite the geopolitical unrest in North Africa and in the Middle East, and the devastating natural disaster in Japan. But expectations turned negative as economic releases confirmed that the global economy was entering a soft patch while the resurgence of the Greek sovereign debt crisis added to concerns. In the latter part of June, investors became more upbeat given some better-than-expected economic news and the passing of a second Greek bailout package.

Although fundamentals in the Canadian banking sector remained strong during the period which translated into a continued improvement to the average Tier1 ratio from 12.6 % a year ago to 13.1% at the end of the period. Bank spreads fell victim to the overall "risk off" impact on credit, and widened slightly during the period.

The Fund performed well despite these challenges, primarily due to drop in the interest rates. The net asset value ("NAV") for Class A units at the end of June was \$25.66. Distributions of \$2.53 have been paid since inception. This compares favourably with the opening NAV of \$23.39 after the deduction of agents' fees and issuance expenses.

The Investment Manager expects yields to grind higher through the remainder of the year, but longer-term yields should remain within a fairly tight range of 3.0% to 3.6% for Canada 10-year. They still expect financials to perform well under this scenario of low interest rates from a historical perspective and continued improving fundamentals as they get ready to meet the Basel III requirements

Please check our web site for quarterly investment updates and other timely information. We appreciate your investment in the Fund and look forward to continued strong performance by the Fund.

Yours truly,

W. Neil Murdoch
Chief Executive Officer
Connor, Clark & Lunn Capital Markets

Management Report of Fund Performance

This semi-annual management report of fund performance for North American Financials Capital Securities Trust (the “Fund”) contains financial highlights but does not contain the complete semi-annual financial statements of the Fund. **The semi-annual financial statements and accompanying notes are attached to this report.**

You can obtain a copy of the Semi-Annual financial statements at no cost by writing to the Manager to the following address: Connor, Clark & Lunn Capital Markets Inc., Suite 300, 181 University Avenue, Toronto, Ontario M5H 3M7, or calling (416) 862-2020 or visiting the Manager’s website at www.cclcapitalmarkets.com or by visiting www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the Fund’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Note that any reference to “Net Assets” or “Net Assets per Unit” or “GAAP Net Assets” means that the value was determined in accordance with the Canadian Generally Accounting Principles “GAAP” for financial statements purposes. Also any reference to “Net Asset Value” or “Net Asset Value per Unit” or “Transactional NAV” means that the value was determined for valuation and transactional purposes. An explanation of the difference between both values can be found in note 3 to the financial statements.

Investment Objectives and Strategy

The Fund is an investment fund established under the laws of the Province of Ontario and governed by the Trust Agreement between the Manager of the Fund and RBC Dexia Investor Services Trust (the “Trustee”) dated September 28, 2009. The Fund’s principal office is at 181 University Avenue, Suite 300, Toronto, Ontario M5H 3M7. The fiscal year-end of the Fund is December 31. Beneficial interest in the net assets and net income of the Fund is divided into units of two classes, Class A Units and Class F Units. Class A Units are listed on the Toronto Stock Exchange under the symbol NAF.UN. Class F Units are not listed on a stock exchange but may be converted into Class A Units on a weekly basis. The principal differences between the Class A Units and the Class F Units are that the agents’ fees payable with respect to the original issuance of the units were lower for the Class F Units, and that the service fee and the TSX listing fees are not paid by Class F Units.

The Fund’s investment objectives are to:

- (i) provide Unitholders with attractive tax-advantaged quarterly cash distributions; and
- (ii) return to Unitholders the original issue price of the Units upon termination of the Fund on November 30, 2014.

Distributions are targeted to be \$1.50 per annum per Unit consisting primarily of returns of capital, representing a return on the issue price of 6.0% per annum.

In order to achieve the Fund’s investment objectives, the Fund obtained exposure, in a tax-efficient manner, to the performance of a portfolio (the “Portfolio”) held by North American Portfolio Trust (the “NAPT” or the “Trust”). Connor, Clark & Lunn Investment Management Ltd. (the “Investment Manager”), the Trust’s investment manager, actively manages the Portfolio. The Portfolio consisting primarily of Canadian Innovative Tier 1 Capital Securities issued by banks (or entities related to banks) and U.S. Financials Capital Securities. The Investment Manager may also invest up to 15% of the Portfolio (measured at the time of investment) in other bonds with a minimum issuer rating of “A” by S&P.

The Fund does not invest directly in the NAPT, the Fund used the net proceeds of the initial public offering of its Class A and Class F Units to pre-pay its purchase obligations under a forward purchase and sale agreement (the “Forward Agreement”) with The Bank of Montreal (the “Counterparty” or “BMO”). Under the Forward Agreement, the Fund will receive, on or before November 30, 2014, a specified portfolio consisting of securities of Canadian public issuers that are “Canadian securities” for the purposes of the Tax Act (“Canadian Securities”) in an amount equal to the net asset value of the NAPT. Partial settlements under the Forward Agreement are intended to ensure that Unitholders have economic

exposure to the distributions effected by NAPT. A fee of 0.35% per annum, calculated with reference to the NAV of NAPT, is payable to BMO under the Forward Agreement.

Risk

Changes in the risk exposure of the Fund occurred in the following areas:

- **Use of leverage**

The Fund is entitled to employ leverage of up to 25% of the total Portfolio held by NAPT. During the period ended June 30, 2011, the Fund applied leverage in the range from 18.0% to 20.9%. The leverage as of June 30, 2011 was 20.9%.

For full disclosure of risks associated with an investment in the Fund's units, please refer to the Prospectus dated September 28, 2009 and to the Fund's most recent Annual Information Form.

Recent Developments

Future accounting changes

The Canadian Accounting Standards Board ("CASB") previously confirmed that effective January 1, 2011, International Financial Reporting Standards ("IFRS") will replace Canadian GAAP for publicly accountable enterprises, which includes investment funds. In June 2010, the CASB issued an exposure draft "Adoption of IFRSs by Investment Companies", proposing that investment companies currently applying Accounting Guideline 18 ("AcG 18") "Investment Companies" issued by the Canadian Institute of Chartered Accountants ("CICA"), defer the adoption of IFRS by one year to fiscal years beginning on or after January 1, 2012. In September 2010, the CASB approved the optional one year deferral from IFRS adoption for investment companies applying AcG 18.

At its January 12, 2011 meeting, the AcSB decided to extend the deferral of mandatory adoption of IFRS for Investment Companies and Segregated Accounts of Life Insurance Enterprises for one additional year. The decision is in response to the International Accounting Standards Board's announcement in late 2010 that its Investment Company project is delayed and will not likely be issued before January 1, 2012, which is the current date of mandatory adoption of IFRS for these entities. As a result, the Fund will delay implementation of IFRS until January 1, 2013.

The Fund's Manager has commenced activities to identify key issues and the likely impacts resulting from the adoption of IFRS and is in the process of developing a changeover plan, which will include identifying differences between the Fund's current accounting policies and those it expects to apply under IFRS, as well as any accounting policy and implementation decisions and their resulting impact, if any, on the GAAP Net Assets of the Fund. Management has presently determined that there will be no significant impact to the GAAP Net Assets per Unit as a result of the changeover to IFRS but will continue to assess based on any changes to existing IFRS.

Results of Operations

Caution regarding forward-looking statements

The analysis in the document includes forward looking statements. The use of any of the words anticipate, may, will, expect, estimate, should, believe and similar expressions are intended to identify forward-looking statements. Such statements reflect the opinion of the Investment Manager regarding factors that might be reasonably expected to affect the performance and the distributions on units of the Fund, and are based on information available at the time of writing. The Investment Manager believes that the expectations reflected in these forward-looking statements and in the analysis are reasonable, but no assurance can be given that these expectations or the analysis will prove to be correct and accordingly they should not be unduly relied on. These statements speak only as of the date of this report. Actual events and outcomes may differ materially from those described in these forward-looking statements or analysis.

Investment Manager Commentary (July 2011)

Throughout the period, investors vacillated between “risk-on” (bullish) and “risk-off” (bearish) sentiments. Initially, investor confidence in the global recovery remained resilient despite the geopolitical unrest in North Africa and in the Middle East, and the devastating natural disaster in Japan. But expectations turned negative as economic releases confirmed that the global economy was entering a soft patch while the resurgence of the Greek sovereign debt crisis added to concerns. In the latter part of June 2011, investors became more upbeat given some better-than-expected economic news and the passing of a second Greek bailout package.

On the monetary front, while Canadian inflation became elevated during the second quarter, the Bank of Canada opted to keep its policy rate unchanged signalling a gradual withdrawal of monetary stimulus in the not too distant future. The US Federal Reserve ended its quantitative easing program (QE2) as scheduled but maintained the size of its balance sheet and stated continued support for an extended period of very low interest rates. The net results were interest rates that remained initially within a trading range mostly dictated by the uncertainty linked to temporary but nonetheless major macro shocks. In the second quarter, yields declined toward the lows reached last October as the bond market benefited from a flight to safety due to the negative impact of economic releases on equity investors.

Fundamentals in the Canadian banking sector remained strong during the period which translated into a continued improvement to the average Tier1 ratio from 12.6 % a year ago to 13.1% at the end of the period. Despite these positive results, bank spreads fell victim to the overall “risk off” impact on credit, which widened slightly during the second quarter. We added slightly to TD Bank and it remains the portfolio’s largest exposure based on its strong fundamentals, its very large domestic franchise and robust capital position.

On the insurance front, the period started on an encouraging note reflecting friendlier environment for the sector. This was short lived as deteriorating economic fundamentals, declining equity markets and overall interest rates reversed the optimism that initially prevailed putting upward pressure on overall spread.

The long-awaited ruling by the Office of the Superintendent of Financial Institutions (OSFI) on the phase-out of specific capital securities was finally announced during the period. OSFI encouraged banks “to the maximum extent possible” to redeem “instruments at their regular par redemption date”. OSFI further characterized redemption due to a regulatory event as being an extraordinary measure that should only be used by a bank if it is not able to manage within the global banking guidelines and would require OSFI approval. In our view, this essentially eliminated the risk of capital securities with regulatory par call features being called prematurely prior to 2020. Further, the major Canadian banks have publicly announced their intention not to exercise the regulatory par call feature prior to 2022.

On the US front, the Federal Reserve eased capital restraints in March based on a comprehensive analysis that enhanced the ability for banks to increase the return on capital for shareholders. While many banks have announced a resumption of modest dividend payout, they remain very conservative in their approach. The US banking sector posted strong results for the period continuing on the trend of capital building and better asset quality.

Outlook

We expect that economic growth in North America will re-accelerate and result in a moderately positive economic outlook for the remainder of the year. While many positive factors such as the rebound of the Japanese economy, the reversal in commodity prices and sustained business spending, support our outlook, we expect that the influence of monetary tightening in emerging markets to control inflation will most likely keep a lid on the pace of overall global growth. A confluence of external factors, such as the risk of contagion from the European sovereign debt situation, further uprisings in the Middle East and the US debt ceiling situation, could lead to heightened market volatility in the near term. However, the commitment of the US Federal Reserve to maintain an accommodative rate environment should help to offset some of the market’s concerns. In Canada, we expect the Bank of Canada will resume raising its policy rate sometime in the second half of the year and we feel the bond market is currently underestimating the probability of higher rates. The Bank of Canada will ultimately find itself in a tight situation having to balance a strong consumer and housing sector versus pressure on the trade sector arising from the appreciation in the Canadian dollar.

We expect yields to grind higher through the remainder of the year, but longer-term yields should remain within a fairly tight range of 3.0% to 3.6% for Canada 10-year. We still expect financials to perform well under this scenario of low interest rates from a historical perspective and continued improving fundamentals as they get ready to meet the Basel III requirements.

Capital transactions

On October 23, 2009, the Fund completed an initial public offering pursuant to the prospectus dated September 28, 2009. \$50,000,000 was raised through the issue of 2,000,000 Class A Units and \$821,500 was raised through the issue of 32,860 Class F Units. The Class A Units were issued at \$25 per unit and incurred agents fees and issue expenses of \$3,215,301 or \$1.61 per unit, for an opening Transactional NAV of \$23.39 per unit. The Class F Units were issued at \$25 per unit and incurred agents fees and issue expenses of \$28,182 or \$0.86 per unit, for an opening Transactional NAV of \$24.14 per unit.

On November 6, 2009, the Agents exercised an over-allotment option in respect of 158,940 Class A Units, raising a further \$3,973,500. Agents' fees were \$208,609 or \$1.31 per unit.

During March 2011 the Fund had its annual Redemption Date. \$4,223,800 was paid to redeem 162,245 of Class A Units.

During the six month period ended June 30, 2011, there were 680 Class F units redeemed for the amount \$18,213. There were also 1,600 Class F Units converted to 1,663 Class A Units for a total value of \$43,570 (There were no capital transactions during the six months period ended June 30, 2010).

Market repurchases

The Trust Agreement provides that the Fund may, in its sole discretion, from time to time, purchase (in the open market or by invitation for tenders) Class A Units for cancellation subject to applicable law and stock exchange requirements, based on the Manager's assessment that such purchases are accretive to Unitholders, in all cases at a price per Class A Unit not exceeding the most recently calculated Net Asset Value per Class A Unit immediately prior to the date of any such purchase of Units.

During the six month period ended June 30, 2011, the Fund purchased 43,100 Class A Units for cancellation for a total cost of \$1,090,861 (the Fund did not purchase any units for cancellation during the six month period from ended June 30, 2010).

Net Assets

The net assets per unit is calculated as the value of the prepaid amount to the counterparty under forward agreement plus any other investments held by the Fund, plus the value of any gain or loss on the Forward Agreement, less any net liabilities of the Fund, divided by the number of units outstanding.

On June 30, 2011, the value of the prepaid amount to counterparty under forward agreement was \$54,906,440. The unrealized gain on forward agreement balance was \$10,516,915. Since the Fund can at any time terminate the Forward Agreement with the Counterparty in exchange for the value of the NAPT, the value of the Forward Agreement to the Fund is equal to the value of the NAPT less the value of the prepaid amount to counterparty under the forward agreement. On June 30, 2011 the value of the unrealized gain on forward agreement balance was \$10,516,915. Other liabilities net of other assets in the Fund totalled \$14,617,482 leaving net assets of \$50,805,873. This amount is assigned to Class A and Class F Unitholders using an allocation percentage that takes into consideration any class level specific expenses. On June 30, 2011 the GAAP Net assets per unit was \$25.57 per Class A Units and \$26.64 per Class F Units.

On December 31, 2010, the value of the prepaid amount to counterparty under forward agreement was \$61,035,432. The unrealized gain on forward agreement balance was \$8,255,413. Since the Fund can at any time terminate the Forward Agreement with the Counterparty in exchange for the value of the NAPT, the value of the Forward Agreement to the Fund is equal to the value of the NAPT less the value of the prepaid amount to counterparty under the forward agreement. On December 31, 2010 the value of the unrealized gain on forward agreement balance was \$8,255,413. Other liabilities net of other assets in the Fund totalled \$14,482,084 leaving net assets of \$54,808,761. This amount is assigned to Class A and Class F Unitholders using an allocation percentage that takes into consideration any class level specific expenses. On December 31, 2010 the GAAP Net assets per unit was \$24.99 per Class A Units and \$25.97 per Class F Units.

Leverage

The Fund's exposure to the securities in the Portfolio through the Forward Agreement may be increased to 25% of the Total Assets (being the aggregate value of the assets of the Fund or NAPT) (tested daily) for the purposes of adding leverage to the Portfolio and such other short term funding purposes as may be determined by the Investment Manager

from time to time and in accordance with the Investment Strategy. The use of leverage has the potential to enhance or reduce returns. At June 30, 2011, the Fund had an outstanding balance of \$13,650,000 under its banking facility (December 31, 2010- \$13,470,000).

Distributions

The Fund pays quarterly distributions initially at \$0.375 per Unit, representing a yield of 6.0% per annum on the Unit issue price.

The Fund has made all its scheduled distributions since its commencement of operations on October 23, 2009. The Fund paid a total of \$0.75 per Class A and Class F Units during the six month period ended June 30, 2011 (\$0.75 during the six month period ended June 30, 2010).

Recommendations or Reports by the Independent Review Committee

The Independent Review Committee of the Board of Advisors tabled no special reports and made no extraordinary material recommendations to management of the Fund during the six months period ended June 30, 2011.

Related Party Transactions

Management Fees

The Manager receives a Management Fee from the Fund and NAPT equal in the aggregate to 0.50% per annum of the applicable Net Asset Value, (0.25% from the Fund and 0.25% from the NAPT), calculated and payable monthly in arrears, plus applicable taxes.

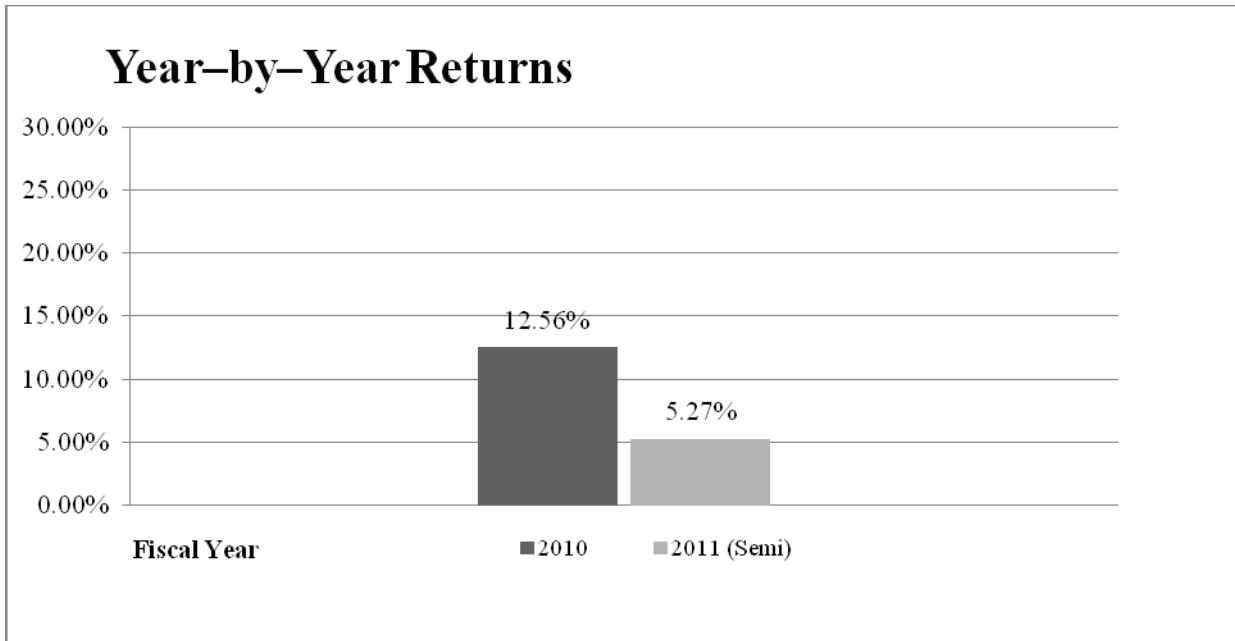

The management fees charged to the Fund and the NAPT on a combined basis during the six months period ended June 30, 2011 were \$141,515 (\$137,952 during the six month period ended June 30, 2010).

The Manager is responsible for payment of the investment management fees out of these management fees.

Past Performance

The following bar charts show the Fund's Class A and Class F annual performance for the year ended December 31, 2010. It also shows the semi annual performance for the six-month period ended June 30, 2011 assuming all the distributions made by the Fund during the periods shown were reinvested. This bar chart shows, in percentage terms, how much an investment made on the first day of the period would have grown or decreased by the last day of the period. Past performance is not necessarily indicative of future performance.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to aid in understanding the Fund's financial performance since inception. This information is derived from the Fund's audited annual financial statements:

Class A Units:

The Fund's Net Assets per Class A Unit:

	June 30, 2011 ⁽²⁾	December 31, 2010	December 31, 2009 ⁽¹⁾
Net Assets, beginning of period	24.99	23.50	25.00
Unit issue expense ⁽³⁾	–	(0.01)	(1.61)
Increase (decrease) from operations:			
Total revenues	–	–	–
Total expenses	(0.24)	(0.45)	(0.09)
Realized gains (losses) for the period	0.54	0.15	–
Unrealized gains (losses) for the period	1.06	3.30	0.46
Total increase (decrease) from operations ⁽⁴⁾	1.36	3.00	(0.37)
Distributions:			
From income (excluding dividends)	–	–	–
From dividends	–	–	–
From capital gains	–	–	–
Return of capital	(0.75)	(1.50)	(0.28)
Total Distributions ⁽⁵⁾	(0.75)	(1.50)	(0.28)
Net Assets, end of period ⁽⁶⁾	25.57	24.99	23.50

⁽¹⁾ Results for the period from October 23, 2009 (commencement of operations) to December 31, 2009.

⁽²⁾ Results for six month period ended June 30, 2011.

⁽³⁾ Issue expense of \$3,423,910 incurred in connection with the Class A Units issuance. The full amount of issue expenses was deducted from the unit capital for accounting purposes and is amortized over a period of five years for tax purposes. Additional issue expense of \$11,549 incurred in connection with the Class A Units issuance during the year ended December 31, 2010.

⁽⁴⁾ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase / decrease from operations is based on the weighted average number of units outstanding over the financial period.

⁽⁵⁾ The percentages used to allocate distributions among income, dividends, capital gain and return on capital are based on estimates.

⁽⁶⁾ This is not reconciliation between the opening and the closing net assets per unit.

Ratios and Supplemental Data (Class A Units):

	June 30, 2011 ⁽²⁾	December 31, 2010	December 31, 2009 ⁽¹⁾
Net asset value (000's)	50,170	54,174	51,099
Number of units outstanding	1,955,258	2,158,940	2,158,940
Base Management expense ratio ⁽³⁾⁽⁴⁾	1.35%	1.36%	1.72%
Issue expenses ratio ⁽³⁾⁽⁴⁾	0.00%	0.02%	6.90%
Interest expense ratio ⁽³⁾⁽⁴⁾	0.56%	0.48%	0.37%
Management expense ratio (annualized) ⁽⁴⁾	1.91%	1.86%	8.99%
Management expense ratio before waivers or absorptions (annualized) ⁽⁴⁾	1.91%	1.86%	8.99%
Portfolio turnover rate ⁽⁵⁾	0.00%	0.00%	0.00%
Trading expense ratio ⁽⁶⁾	0.00%	0.00%	0.00%
Net asset value per unit ⁽⁷⁾	25.66	25.09	23.67
Closing market price (TSX)	25.45	25.00	24.00

⁽¹⁾ Results for the period from October 23, 2009 (commencement of operations) to December 31, 2009.

⁽²⁾ Results for six month period ended June 30, 2011.

⁽³⁾ A separate base management expense ratio has been presented to include the normal operating expenses and exclude the Issue expense ratio: representing all agents' fees and unit issue expenses, and Interest expense ratio: representing cost of leverage.

⁽⁴⁾ Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. Unit issue expenses, representing all Agents' fees and other offering expenses, which are one-time expenses, have not been annualized.

⁽⁵⁾ The Fund's turnover rate indicates how actively the Fund's Manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund's buying and selling all of the securities (including fixed income) in its portfolio once in the course of the year. There is not necessarily a relationship between turnover rate and the performance of the Fund.

⁽⁶⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

⁽⁷⁾ The net asset value (Transactional NAV) per unit is based on the last traded price for the day of the underlying portfolio, whereas the net assets per unit (GAAP Net Assets) is based on the closing bid prices of the underlying portfolio; hence the difference between the two amounts.

Class F Units:

The Fund's Net Assets per Class F Unit:

	June 30, 2011 ⁽²⁾	December 31, 2010	December 31, 2009 ⁽¹⁾
Net Assets, beginning of period	25.97	24.26	25.00
Unit issue expense ⁽³⁾	–	(0.01)	(0.86)
Increase (decrease) from operations:			
Total revenues	–	–	–
Total expenses	(0.24)	(0.47)	(0.09)
Realized gains (losses) for the period	0.54	0.15	–
Unrealized gains (losses) for the period	1.16	3.53	0.49
Total increase (decrease) from operations ⁽⁴⁾	1.45	3.21	(0.40)
Distributions:			
From income (excluding dividends)	–	–	–
From dividends	–	–	–
From capital gains	–	–	–
Return of capital	(0.75)	(1.50)	(0.28)
Total Distributions ⁽⁵⁾	(0.75)	(1.50)	(0.28)
Net Assets, end of period ⁽⁶⁾	26.64	25.97	24.26

⁽¹⁾ Results for the period from October 23, 2009 (commencement of operations) to December 31, 2009.

⁽²⁾ Results for six month period ended June 30, 2011.

⁽³⁾ Issue expense of \$28,182 incurred in connection with the Class F Units issuance. The full amount of issue expenses was deducted from the unit capital for accounting purposes and is amortized over a period of five years for tax purposes.

⁽⁴⁾ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase / decrease from operations is based on the weighted average number of units outstanding over the financial period.

⁽⁵⁾ The percentages used to allocate distributions among income, dividends, capital gain and return on capital are based on estimates.

⁽⁶⁾ This is not reconciliation between the opening and the closing net assets per unit.

Ratios and Supplemental Data (Class F Units):

	June 30, 2011 ⁽²⁾	December 31, 2010	December 31, 2009 ⁽¹⁾
Net asset value (000's)	818	857	803
Number of units outstanding	30,580	32,860	32,860
Base Management expense ratio ⁽³⁾⁽⁴⁾	0.91%	0.94%	1.25%
Issue expenses ratio ⁽³⁾⁽⁴⁾	0.00%	0.02%	3.56%
Interest expense ratio ⁽³⁾⁽⁴⁾	0.56%	0.48%	0.37%
Management expense ratio (annualized) ⁽⁴⁾	1.47%	1.44%	5.18%
Management expense ratio before waivers or absorptions (annualized) ⁽⁴⁾	1.47%	1.44%	5.18%
Portfolio turnover rate ⁽⁵⁾	0.00%	0.00%	0.00%
Trading expense ratio ⁽⁶⁾	0.00%	0.00%	0.00%
Net asset value per unit ⁽⁷⁾	26.74	26.08	24.44

⁽¹⁾ Results for the period from October 23, 2009 (commencement of operations) to December 31, 2009.

⁽²⁾ Results for six month period ended June 30, 2011.

⁽³⁾ A separate base management expense ratio has been presented to include the normal operating expenses and exclude the Issue expense ratio: representing all agents' fees and unit issue expenses, and Interest expense ratio: representing cost of leverage.

⁽⁴⁾ Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. Unit issue expenses, representing all Agents' fees and other offering expenses, which are one-time expenses, have not been annualized.

⁽⁵⁾ The Fund's turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund's buying and selling all of the securities (including fixed income) in its portfolio once in the course of the year. There is not necessarily a relationship between turnover rate and the performance of the Fund.

⁽⁷⁾ The net asset value (Transactional NAV) per unit is based on the last traded price for the day of the underlying portfolio, whereas the net assets per unit (GAAP Net Assets) is based on the closing bid prices of the underlying portfolio; hence the difference between the two amounts.

Summary of Investment Portfolio as of June 30, 2011

The summary of investment portfolio may change due to ongoing portfolio transactions of the Fund. A quarterly update is available at www.cclcapitalmarkets.com and at www.sedar.com.

⁽¹⁾North American Financials Capital Securities Trust (the "Fund") obtained exposure to the performance of the portfolio held by North American Portfolio Trust ("NAPT") through the Forward Agreement (see note 8), thus the portfolio of NAPT is presented as part of this statement.

North American Financials Capital Securities Trust

Notes to Financial Statements (Unaudited)

June 30, 2011

1 Corporate activities

North American Financials Capital Securities Trust (the "Fund") is an investment fund established under the laws of the Province of Ontario and governed by the Trust Agreement between Connor, Clark & Lunn Capital Markets Inc. (the "Manager") the Manager of the Fund and RBC Dexia Investor Services Trust (the "Trustee") dated September 28, 2009. The Fund's principal office is at 181 University Avenue, Suite 300, Toronto, Ontario M5H 3M7. The fiscal year-end of the Fund is December 31. The Fund is divided into units of two classes, Class A Units and Class F Units. Class A Units are listed on the Toronto Stock Exchange under the symbol NAF.UN. Class F Units are not listed on a stock exchange but may be converted into Class A Units on a weekly basis.

2 Investment objectives

The Fund's investment objectives as set out in the Prospectus dated September 28, 2009 are to:

- (i) provide Unitholders with attractive tax-advantaged quarterly cash distributions; and
- (ii) return to Unitholders the original issue price of the Units upon termination of the Fund on November 30, 2014.

Distributions are targeted to be \$1.50 per annum per Unit consisting primarily of returns of capital, representing a yield on the issue price of 6.0% per annum.

In order to achieve the Fund's investment objectives, the Fund obtained exposure, in a tax-efficient manner, to the performance of a portfolio (the "Portfolio") held by North American Portfolio Trust (the "NAPT" or the "Trust"). Connor, Clark & Lunn Investment Management Ltd. (the "Investment Manager"), the Trust's investment manager, actively manages the Portfolio. The Portfolio consisting primarily of in Canadian Innovative Tier 1 Capital Securities issued by banks (or entities related to banks) and U.S. Financials Capital Securities. The Investment Manager may also invest up to 15% of the Portfolio (measured at the time of investment) in other bonds with a minimum issuer rating of "A" by S&P.

3 Summary of significant accounting policies

Basis of presentation

These financial statements, prepared in accordance with Canadian generally accepted accounting principles, include estimates and assumptions by management that affect the reported amounts of assets, liabilities, income and expenses during the reporting period. Actual results could differ from these estimates. The following is a summary of the significant accounting policies of the Fund.

Future accounting changes

The Canadian Accounting Standards Board ("CASB") previously confirmed that effective January 1, 2011, International Financial Reporting Standards ("IFRS") will replace Canadian GAAP for publicly accountable enterprises, which includes investment funds. In June 2010, the CASB issued an exposure draft "Adoption of IFRSs by Investment Companies", proposing that investment companies currently applying Accounting Guideline 18 ("AcG 18") "Investment Companies" issued by the Canadian Institute of Chartered Accountants ("CICA"), defer the adoption of IFRS by one year to fiscal years beginning on or after January 1, 2012. In September 2010, the CASB approved the optional one year deferral from IFRS adoption for investment companies applying AcG 18.

At its January 12, 2011 meeting, the AcSB decided to extend the deferral of mandatory adoption of IFRS for Investment Companies and Segregated Accounts of Life Insurance Enterprises for one additional year. The decision is in response to the International Accounting Standards Board's announcement in late 2010 that its Investment Company project is delayed and will not likely be issued before January 1, 2012, which is the current date of mandatory adoption of IFRS for these entities. As a result, the Fund will delay implementation of IFRS until January 1, 2013.

The Fund's Manager has commenced activities to identify key issues and the likely impacts resulting from the adoption of IFRS and is in the process of developing a changeover plan, which will include identifying differences between the Fund's current accounting policies and those it expects to apply under IFRS, as well as any accounting policy and implementation decisions and their resulting impact, if any, on the GAAP Net Assets of the Fund. Management has presently determined that there will be no significant impact to the GAAP Net Assets per Unit as a result of the changeover to IFRS but will continue to assess based on any changes to existing IFRS.

Valuation of investments

Investments are deemed to be categorized as "held for trading" in accordance with CICA 3855, Financial Instruments – Recognition and Measurement ("Section 3855") and therefore are recorded at fair value, established by the closing bid price for a security on the recognized exchange on which it is principally traded ("GAAP Net Assets"). Should the quoted value for a security, in the opinion of the Manager, be inaccurate, unreliable or not readily available, the fair value of the security is estimated based on valuation techniques. Fair value is determined by the Manager on the basis of the most recently reported information for the security, similar securities and the markets in which the security is active. Investment purchase and sale transactions are recorded as of the trade date and realized and unrealized gains and losses on investments are determined using average cost. Brokers' commissions and other transaction charges are immediately charged to net income in the period incurred. The Canadian Securities Administrators allow investment funds to calculate the daily net asset value for the purpose of processing unitholder transactions using the last traded price for the day as fair value of financial instruments traded in an active market, which is referred to as a "Transactional NAV". The fund processes unitholder transactions using Transactional NAV.

The reconciliation between the Transactional NAV and the GAAP Net Assets as a result of the adoption of Section 3855 is as follows:

	Transactional NAV	Section 3855 Adjustment	GAAP Net Assets
Per Class A Unit			
December 31, 2010	25.09	(0.10)	24.99
June 30, 2011	25.66	(0.09)	25.57
Per Class F Unit			
December 31, 2010	26.08	(0.11)	25.97
June 30, 2011	26.74	(0.10)	26.64

North American Financials Capital Securities Trust

Notes to Financial Statements (Unaudited)

June 30, 2011

Cash and short term investments

Cash and short term investments include cash and cash equivalents with maturities of less than 90 days from the date of acquisition.

Income recognition

Income from investments is recognized on an accrual basis. Dividend income is recognized at the time a security trades on an ex-dividend basis. Interest income is based on the number of days the investment is held during the period. All income, realized and unrealized net gains (losses) and transaction costs (apart from an insignificant amount of income arising from cash) are attributable to investments and derivatives which are deemed held for trading.

Foreign currency translation

Assets and liabilities denominated in foreign currencies are translated into Canadian dollars at the exchange rate prevailing at the end of the year. Purchases and sales of investments and income and expenses are translated into Canadian dollars at the exchange rate prevailing on the transaction dates.

Increase (decrease) in net assets from operation per unit

This calculation is based on the increase (decrease) in net assets from operations attributable to each class divided by the weighted average number of units of that class outstanding during the period.

Valuation of series

A separate net assets per unit is calculated for each class. The net assets of a class are computed by calculating the class' proportionate share of the assets and liabilities to all classes, less the liabilities attributable only to that class. Expenses directly attributable to a class are charged to that class. Other expenses, income, realized and unrealized gains and losses are allocated proportionately to each class based upon the relative net assets of each class.

4 Custodian

Pursuant to the Trust Agreement RBC Dexia Investor Services Trust ("the Custodian") acts as custodian of the assets of the Fund. The Custodian is also responsible for certain aspects of the Fund's day-to-day operations, including calculating the Net Asset Value ("NAV"), net income and net realized capital gains of the Fund and maintaining the books and records of the Fund. In consideration for these services, the Fund pays a fee to the Custodian.

5 Bank indebtedness

The Fund's exposure to the securities in the Portfolio through the Forward Agreement may be increased to 25% of the NAV (being the aggregate value of the assets of the NAPT) (computed daily) for the purposes of adding leverage to the Portfolio and such other short term funding purposes as may be determined by the Investment Manager from time to time and in accordance with the Investment Strategy. The use of leverage has the potential to enhance or reduce returns. Initially, the Fund is expected to employ leverage of 25% of the NAV of NAPT.

The Fund entered into a letter of agreement (the "Credit Agreement") dated October 23, 2009, between the Manager and the Bank of Montreal (the "Counterparty" or "BMO"), to borrow amounts up to 25% of the NAV of the NAPT as being part of the Forward Agreement (see note 8). This agreement will be terminated on the earlier of (i) November 21, 2014, and (ii) the date on which this Transaction is pre-settled in full pursuant to the terms of the Credit Agreement.

During the six month period ended June 30, 2011, the Fund had bank indebtedness balances between \$12.35 million and \$13.65 million or 18.0% to 20.9% of the NAV of NAPT. The related interest expense during the same period was \$151,717. At December 31, 2010, the borrowed balance was \$13,650,000. (During the six month period ended June 30, 2010, the Fund had bank indebtedness balances between \$13,700,000 and \$14,400,000 or 20.5% to 22.2% of the portfolio held by NAPT. The related interest expense during the same period was \$111,606. At June 30, 2010, the borrowed balance was \$13,700,000.)

6 Unitholders' equity

The Fund is authorized to issue an unlimited number of redeemable, transferable units of Class A and Class F Units, each of which represents an equal, undivided interest in the net assets of the Fund, subject to the terms and conditions of the Trust Agreement.

A holder of Class F Units may convert Class F Units into Class A Units on a weekly basis.

On October 23, 2009, the Fund completed an initial public offering pursuant to the prospectus dated September 28, 2009. \$50,000,000 was raised through the issue of 2,000,000 Class A Units and \$821,500 was raised through the issue of 32,860 Class F Units. The Class A Units were issued at \$25 per unit and incurred agents fees and issue expenses of \$3,215,301 or \$1.61 per unit, for an opening Transactional NAV of \$23.39 per unit. The Class F Units were issued at \$25 per unit and incurred agents fees and issue expenses of \$28,182 or \$0.86 per unit, for an opening Transactional NAV of \$24.14 per unit.

On November 6, 2009, the Agents exercised an over-allotment option in respect of 158,940 Class A Units, raising a further \$3,973,500. Agents' fees were \$208,609 or \$1.31 per unit. There were no capital transactions during the six months period ended June 30, 2011.

Class A Units and Class F Units may be redeemed on an Annual Redemption Date, subject to certain conditions and, in order to effect such a redemption, the Units must be surrendered by no later than 5:00 p.m. (Toronto time) on the last Business Day of March in the year of redemption. Unitholders whose Units are redeemed on an Annual Redemption Date will receive a redemption price in an amount equal to 100% of the Net Asset Value per Unit of the relevant class less any costs associated with the redemption, including brokerage costs, and less any net realized capital gains to the Fund that are distributed to a Unitholder concurrently with the proceeds of disposition on redemption.

In addition to the annual redemption right, Class A Units and Class F Units may also be redeemed on a Monthly Redemption Date, subject to certain conditions and, in order to effect such a redemption, the Units must be surrendered by no later than 5:00 p.m. (Toronto time) on the date which is the last Business Day of the month preceding the Monthly Redemption Date. Payment of the redemption price will be made on or before the Redemption Payment Date, subject to the Manager's right to suspend redemptions

North American Financials Capital Securities Trust

Notes to Financial Statements (Unaudited)

June 30, 2011

in certain circumstances. Concurrently with the payment of the proceeds of redemption, the Fund may pay to the redeeming Unitholder a cash distribution in the amount of the net realized capital gains of the Fund incurred by it to fund the payment of the redemption price. Unitholders surrendering a Class A Unit for redemption will receive a redemption price equal to the lesser of (i) 95% of the Market Price of a Class A Unit, and (ii) 100% of the Closing Market Price of a Class A Unit on the applicable Monthly Redemption Date less, in each case, any costs associated with the redemption, including brokerage costs, being the Monthly Redemption Amount. Unitholders surrendering a Class F Unit for redemption will receive an amount equal to the product of (i) the Monthly Redemption Amount and (ii) a fraction, the numerator of which is the most recently calculated Net Asset Value per Class F Unit and the denominator of which is the most recently calculated Net Asset Value per Class A Unit.

During March 2011 the Fund had its annual Redemption Date. \$4,223,800 was paid to redeem 162,245 of Class A Units.

During the six month period ended June 30, 2011, there were 680 Class F units redeemed for the amount \$18,213. There were also 1,600 Class F Units converted to 1,663 Class A Units for a total value of \$43,570 (There were no capital transactions during the six months period ended June 30, 2010).

Changes in outstanding units during the six month periods ended June 30, 2011 and 2010 are summarized as follows:

	Class A Units		Class F Units	
	June 30, 2011	June 30, 2010	June 30, 2011	June 30, 2010
Balance – beginning of period/year	2,158,940	32,860	2,158,940	32,860
Class F Units converted to Class A Units	1,663	(1,600)	–	–
Units redeemed	(162,245)	680	–	–
Units cancelled (note 7)	(43,100)	–	–	–
Balance – end of period/year	<u>1,955,258</u>	<u>30,580</u>	<u>2,158,940</u>	<u>32,860</u>

The Fund considers capital to include all units issued and outstanding. The Fund manages its capital in accordance with the objectives outlined in Note (2)

7 Market Purchase Program

The Trust Agreement provides that the Fund may, in its sole discretion, from time to time, purchase (in the open market or by invitation for tenders) Class A Units for cancellation subject to applicable law and stock exchange requirements, based on the Manager's assessment that such purchases are accretive to Unitholders, in all cases at a price per Class A Unit not exceeding the most recently calculated Net Asset Value per Class A Unit immediately prior to the date of any such purchase of Units.

During the six month period ended June 30, 2011, the Fund purchased 43,100 Class A Units for cancellation for a total cost of \$1,090,861 (the Fund did not purchase any units for cancellation during the six month period from ended June 30, 2010).

8 Forward Agreement

The Fund does not invest directly in the NAPT, the Fund used the net proceeds of the initial public offering of its Class A and Class F Units to pre-pay its purchase obligations under a forward purchase and sale agreement (the "Forward Agreement") with The Bank of Montreal (the "Counterparty" or "BMO"). Under the Forward Agreement, the Fund will receive, on or before June 30, 2014, a specified portfolio consisting of securities of Canadian public issuers that are "Canadian securities" for the purposes of the Tax Act ("Canadian Securities") in an amount equal to the value of the NAPT. Partial settlements under the Forward Agreement are intended to ensure that Unitholders have economic exposure to the distributions effected by NAPT. A fee of 0.35% per annum, calculated with reference to the principal amount of the CLN, is payable to BMO under the Forward Agreement.

On June 30, 2011, the value of the prepaid amount to counterparty under forward agreement was \$54,906,440. The unrealized gain on forward agreement balance was \$10,516,915. Since the Fund can at any time terminate the Forward Agreement with the Counterparty in exchange for the value of the NAPT, the value of the Forward Agreement to the Fund is equal to the value of the NAPT less the value of the prepaid amount to counterparty under the forward agreement. On June 30, 2011 the value of the unrealized gain on forward agreement balance was \$10,516,915. Other liabilities net of other assets in the Fund totalled \$14,617,482 leaving net assets of \$50,805,873. This amount is assigned to Class A and Class F Unitholders using an allocation percentage that takes into consideration any class level specific expenses. On June 30, 2011 the GAAP Net assets per unit was \$25.57 per Class A Units and \$26.64 per Class F Units. (On December 31, 2010, the value of the prepaid amount to counterparty under forward agreement was \$61,035,432. The unrealized gain on forward agreement balance was \$8,255,413. Since the Fund can at any time terminate the Forward Agreement with the Counterparty in exchange for the value of the NAPT, the value of the Forward Agreement to the Fund is equal to the value of the NAPT less the value of the prepaid amount to counterparty under the forward agreement. On December 31, 2010 the value of the unrealized gain on forward agreement balance was \$8,255,413. Other liabilities net of other assets in the Fund totalled \$14,482,084 leaving net assets of \$54,808,761. This amount is assigned to Class A and Class F Unitholders using an allocation percentage that takes into consideration any class level specific expenses. On December 31, 2010 the GAAP Net assets per unit was \$24.99 per Class A Units and \$25.97 per Class F Units.)

9 Distributions

The Fund pays quarterly distributions initially at \$0.375 per Unit, representing a yield of 6.0% per annum on the Unit issue price.

The Fund has made all its scheduled distributions since its commencement of operations on October 23, 2009. The Fund paid a total of \$0.75 per Class A and Class F Units during the six month period ended June 30, 2011 (\$0.75 during the six month period ended June 30, 2010).

North American Financials Capital Securities Trust

Notes to Financial Statements (Unaudited)

June 30, 2011

10 Management Fees

The Manager receives a Management Fee from the Fund and NAPT equal in the aggregate to 0.50% per annum of the applicable Net Asset Value, (0.25% from the Fund and 0.25% from the NAPT), calculated and payable monthly in arrears, plus applicable taxes.

The management fees charged to the Fund during the six months period ended June 30, 2011 were \$67,035 (\$68,976 during the six month period ended June 30, 2010).

The Manager is responsible for payment of the investment management fees out of these management fees.

11 Service Fee

The Fund pays to the Manager a Service Fee (calculated quarterly and paid as soon as practicable after the end of each calendar quarter); solely with respect to the Class A Units, equal to 0.40% per annum of the Net Asset Value attributable to the Class A Units, plus applicable taxes. The Service Fee is applied by the Manager to pay a service fee in an equivalent aggregate amount, plus applicable taxes, to brokers based on the number of Class A Units held by clients of such brokers at the end of the relevant quarter. No Service Fee is payable in respect of the Class F Units.

The service fees charged to the Fund during the six months period ended June 30, 2011 was \$108,884 (\$105,383 during the six months period ended June 30, 2010).

12 Income taxes

The Fund qualifies as a mutual fund trust under the provisions of the Income Tax Act (Canada) and, accordingly, is subject to tax on its investment income, including net realized capital gains, for any calendar year in which its net investment income or sufficient net realized capital gains are not paid or payable to its unitholders as at the end of the calendar year. It is the intention of the Manager that all annual net investment income and sufficient net taxable capital gains will be distributed to unitholders on a calendar year basis such that Canadian income taxes payable by the Fund under present legislation will be eliminated. As a result thereof, and of the deduction of expenses in computing its taxable income, no provisions for income taxes are made in the financial statements.

The Fund did not have any net taxable capital losses carry forward balances as at December 31, 2010 and 2009 (the Fund's tax year end is December 31st), and had non-capital losses of \$1,790,826 (2009 – \$309,908), which will expire within the next twenty years as shown in the following table:

Year of the realized non-capital tax loss	Amount of tax loss	Expiry date
2009	309,908	2029
2010	1,480,918	2030
Total	1,790,826	

13 Broker commission charges and soft dollar services

There were \$nil of broker commissions paid during the six months periods ended June 30, 2011 and 2010 in connection with portfolio transactions. No contractual arrangements for soft dollar services exist in the broker commission charges.

14 Financial instruments

	June 30, 2011	December 31, 2010
Assets	\$	\$
Cash	22,722	61,789
Held for trading	65,430,960	69,299,530
Loans and receivables	11,566	6,931
Total assets	65,465,248	69,368,250
Liabilities		
Held for trading	–	–
Financial liabilities at amortized cost	14,659,375	14,559,489
Total liabilities	14,659,375	14,559,489

For the purposes of categorization in accordance with CICA Section 3862, Financial Instruments - Disclosures, bank indebtedness, interest payable, distributions payable, management fees payable and accounts payable and accrued liabilities are deemed to be financial liabilities and reported at amortized cost.

North American Financials Capital Securities Trust

Notes to Financial Statements (Unaudited)

June 30, 2011

The Fund obtained exposure to the performance of the portfolio held by NAPT through the Forward Agreement (see note 8), and therefore the following table illustrates the classification of the Fund's and the NAPT's financial instruments within the fair value hierarchy as June 30, 2011 and December 31, 2010:

Assets at fair value as at June 30, 2011	Level 1	Level 2	Level 3	Total
Equities	5,745,695	–	–	5,745,695
Bonds	–	57,205,758	–	57,205,758
Short-term investments	–	1,495,735	–	1,495,735
Foreign currency forward contracts	–	667,708	–	667,708
Total	5,745,695	59,369,201	–	65,114,896

Assets at fair value as at December 31, 2010	Level 1	Level 2	Level 3	Total
Equities	5,738,574	–	–	5,738,574
Bonds	–	60,449,111	–	60,449,111
Short-term investments	–	2,294,688	–	2,294,688
Foreign currency forward contracts	–	379,077	–	379,077
Total	5,738,574	63,122,876	–	68,861,450

Fair values are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3.

Equities: The Fund's long equity positions are classified as Level 1 as the security held is actively traded and a reliable quote is observable.

Bonds and short-term investments: Bonds and Short-term investments are classified as Level 2 as they are valued using observable inputs, including interest rate curves, credit spreads and volatilities.

Foreign currency forward contracts: Foreign currency forward contracts for which inputs, including interest rates, forward market rates and credit spreads are observable and reliable, or for which unobservable inputs are determined not to be significant to fair value, are classified as Level 2.

There were no transfers among the three levels during the six months periods ended June 30, 2011 and 2010.

15 Financial instrument risk

The Fund obtained exposure to the performance of the portfolio held by NAPT through the Forward Agreement (see note 8) and therefore the risks associated with an investment in the Fund's units are best defined by describing the financial risks associated with an investment in the NAPT's portfolio.

Interest rate risk

Interest rate risk arises on interest-bearing financial instruments held in the investment portfolio such as bonds and short term notes. The Fund is exposed to the risk that the value of interest-sensitive financial instruments will fluctuate due to changes in the prevailing levels of market interest rates. The table below summarizes the exposure of the Fund and NAPT interest rate risks. It includes the assets and liabilities of the Fund and NAPT at fair value.

June 30, 2011:

	Less than 1 year	1 - 3 years	3 - 5 years	> 5 years	Non-interest bearing	Total
Investments	772,082	–	2,982,165	53,451,511	5,745,695	62,951,453
Cash and cash equivalents	1,495,735	–	–	–	75,968	1,571,703
Other assets	–	–	–	–	959,952	959,952
Liabilities	–	–	(13,650,000)	–	(1,027,235)	(14,677,235)
Net assets						50,805,873

December 31, 2010:

	Less than 1 year	1 - 3 years	3 - 5 years	> 5 years	Non-interest bearing	Total
Investments	–	842,119	–	59,606,992	6,126,336	66,575,447
Cash and cash equivalents	2,408,617	–	–	–	–	2,408,617
Other assets	–	–	–	–	415,474	415,474
Liabilities	–	–	(13,470,000)	–	(1,120,777)	(14,590,777)
Net assets						54,808,761

As at June 30, 2011, had prevailing interest rates raised or lowered by 1.0%, with all other variables held constant, net assets would have decreased or increased, respectively, by approximately \$3,765,000 (December 31, 2010 - \$3,786,000). In practise, actual results may differ from this sensitivity analysis and the difference could be material.

Currency risk

Currency risk arises from financial instruments that are denominated in a currency other than the Canadian dollar, which is the Fund's functional currency. The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Statement of Investments identifies all securities denominated in foreign currencies.

The table below summarizes the Fund's combined exposure to foreign currencies held by the fund and NAPT. Amounts shown are based on the carrying values of monetary and non-monetary assets as well as the underlying principal amounts of foreign currency derivatives such as forward contracts. Other financial assets and liabilities such denominated in foreign currencies do not expose the Fund to significant currency risk. The table below summarizes the NAPT's significant exposure to foreign currencies and

North American Financials Capital Securities Trust

Notes to Financial Statements (Unaudited)

June 30, 2011

the approximate impact on net assets had the Canadian Dollar ("CAD") weakened by 5% in relation to these currencies. If the Canadian dollar were to strengthen relative to these currencies, the opposite would occur. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

June 30, 2011:

	Monetary instruments \$	Non-monetary instruments \$	Derivative instruments \$	Net Exposure \$	% of Net Assets	Sensitivity (based on devaluation of CAD) \$
US Dollar	26,007,180	5,738,090	(32,154,300)	(409,030)	(0.6%)	(20,000)

December 31, 2010:

	Monetary instruments \$	Non-monetary instruments \$	Derivative instruments \$	Net Exposure \$	% of Net Assets	Sensitivity (based on devaluation of CAD) \$
US Dollar	25,986,691	5,738,574	(31,875,118)	(149,853)	(0.3%)	(7,000)

Credit risk

The Fund is exposed to the risk that a security issuer or counterparty will be unable to pay amounts in full when due. The fair value of debt securities includes consideration of the credit worthiness of the debt issuer. The carrying amount of debt investments and unrealized gain on derivative instruments outstanding with counterparties represents the maximum credit risk exposure as at June 30, 2011 and December 31, 2010.

The tables below summarize the Fund's exposure to credit risk as of June 30, 2011 and December 31, 2010. Amounts shown are based on the carrying value of debt investments and the unrealized gain on derivative instruments outstanding with counterparties.

June 30, 2011:

Rating	(% of Net Assets)
AA-	1.3%
A	64.6%
BBB	47.9%
A-1+	3.0%
Total	116.8%

December 31, 2010:

Rating	(% of Net Assets)
AAA	0.7%
A+	11.3%
A	53.6%
A-	20.5%
BBB+	23.3%
BBB-	1.5%
BB+	10.4%
A-1+	2.3%
A-1	1.4%
Total	125.5%

As at June 30, 2011 and December 31, 2010, no debt securities were contractually past due and no longer meeting interest payment obligations.

All transactions in listed securities are settled or paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

Liquidity risk

Liquidity risk is the risk of not being able to meet the Fund's cash requirements in a timely manner and includes the risk of not being able to liquidate assets at reasonable prices. This risk arises mainly from the Fund's exposure to daily cash redemptions from to its market purchase program which is limited to certain conditions (see note 7). The Fund is also exposed to unlimited annual anniversary redemptions on March 31 of every year (see note 6). Therefore, the Fund invests the majority of its assets in investments that can be readily disposed. In addition, the Fund retains sufficient cash and cash equivalent positions to meet its daily cash requirements. All liabilities (other than bank indebtedness) are due within three months.
